5th International Workshop
On The Treatment Of Hepatic And Lung Metastases Of Colorectal Carcinoma

November 12th and 13th, 2015.
Hotel NH Barcelona Constanza. Barcelona, Spain.

Organised by:

Oncology and Hematology Service
Unit of Hepato- Biliary and Pancreatic Surgery
Thoracic Surgery Service

Hospital Universitari MútuaTerrassa (Terrassa, Barcelona, Spain)
Fundació Docència i Recerca MútuaTerrassa
The most common metastatic localizations of colorectal cancer occur in the liver and the lungs. Multidisciplinary treatment of patients suffering from metastatic localization of colorectal cancer has shown encouraging results in improving the chances for a cure.

The Workshop is focusing on the state-of-the art of the multimodal management of lung and liver metastases.

We invite you to actively participate in the scientific programme.

We look forward to a memorable meeting and hope to see you in Barcelona!
